DETAILED ACTION

Claim Objections

1. The term "a lot" in claim 4 is a relative term which renders the claim indefinite.

The term "a lot" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The claim has been examined so that "a lot of tension" is not given any weight.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Weeks.

Weeks discloses a hair fastener including a zigzag member having a series of substantially sharp angles (ends 18) spread out in alternate directions, as shown in Figures 5 and 6. The two side members (19 and 20) at each end of the zigzag member form a bobby pin. The zigzag member is substantially the same width throughout, as shown in Figures 5 and 6. The zigzag member is adapted to be placed into a section of

Art Unit: 3732

hair, as described in column 3, lines 1-24. Each of the sharp angles (ends 18) are spread out enough to hold a section of hair therebetween. Each bobby pin holds the zigzag member in the hair by squeezing and grasping a section of the hair, as explained in column 3, lines 32-36.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Weeks in view of Zinn.

Weeks discloses the features discussed above, but does not disclose a decorative member on an angle of the zigzag member. Zinn discloses a decorative member (head section 1) attached to a comb (toothed section 2). The comb of Zinn performs the same function as the zigzag member of Walker. The function of Zinn can be found in lines 8-14 and the function of Weeks can be found in column 3, lines 1-24. It would have been obvious to one with ordinary skill in the art at the time the invention was made to make the zigzag member of Walker with a decorative member, as taught by Zinn, in order to further decorate the user's hair.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
